

Stories we are teaching this term:

Some of the children will be studying 'Wonder' by R. J. Palacio for their literacy and reading skills.

We are all going to be looking at atlases and maps as part of our topic. Particularly maps, as we are going to make our own.

We will also be exploring lots of new and exciting books at the library this term.

Literacy:

The children in Hawk Class will be focusing on sentence building this term. We will be making our own sentences using a variety of resources and then learning to repeat them to keep them in our heads in order to write them down correctly. Some of the children will then be reviewing and improving their sentences with more challenging vocabulary.

Problem Solving and Reasoning :

Our first focus is calculation this term and we are going to be developing our adding, subtracting, multiplying and dividing skills.

Secondly, we are going to be learning about routines and time in another unit of measure.

Over-arching topic (On the Move)

Term 4

Hawk Class

How you Can help at home.

PLEASE, send us your empty boxes and packaging so that we can build and create landscapes for our maps.

Encourage your child to think about 'now' and 'next', their daily routines and how some things happen at the same time each day.

Other Curriculum areas:

Science: The children will be learning about 'pushing', 'pulling', speed and direction in science.

PSHE: We will be continuing our work on 'Zones of Regulation' this term. We will also be starting to learn about puberty and the changes that will or are taking place in our bodies.

ICT: We will be learning to use 'Beebots' to explore direction and programming.

Highlights:

Visiting Abingdon Library and borrowing some exciting new books for the class.

Learning to use the 'Beebots' and how to program them independently.

Creating maps and 3D models of our own to develop our very own play mats.
